“Il design sostenibile è fatto di rispetto, responsabilità, conoscenza e ricerca, per una protezione attiva dell'ambiente”

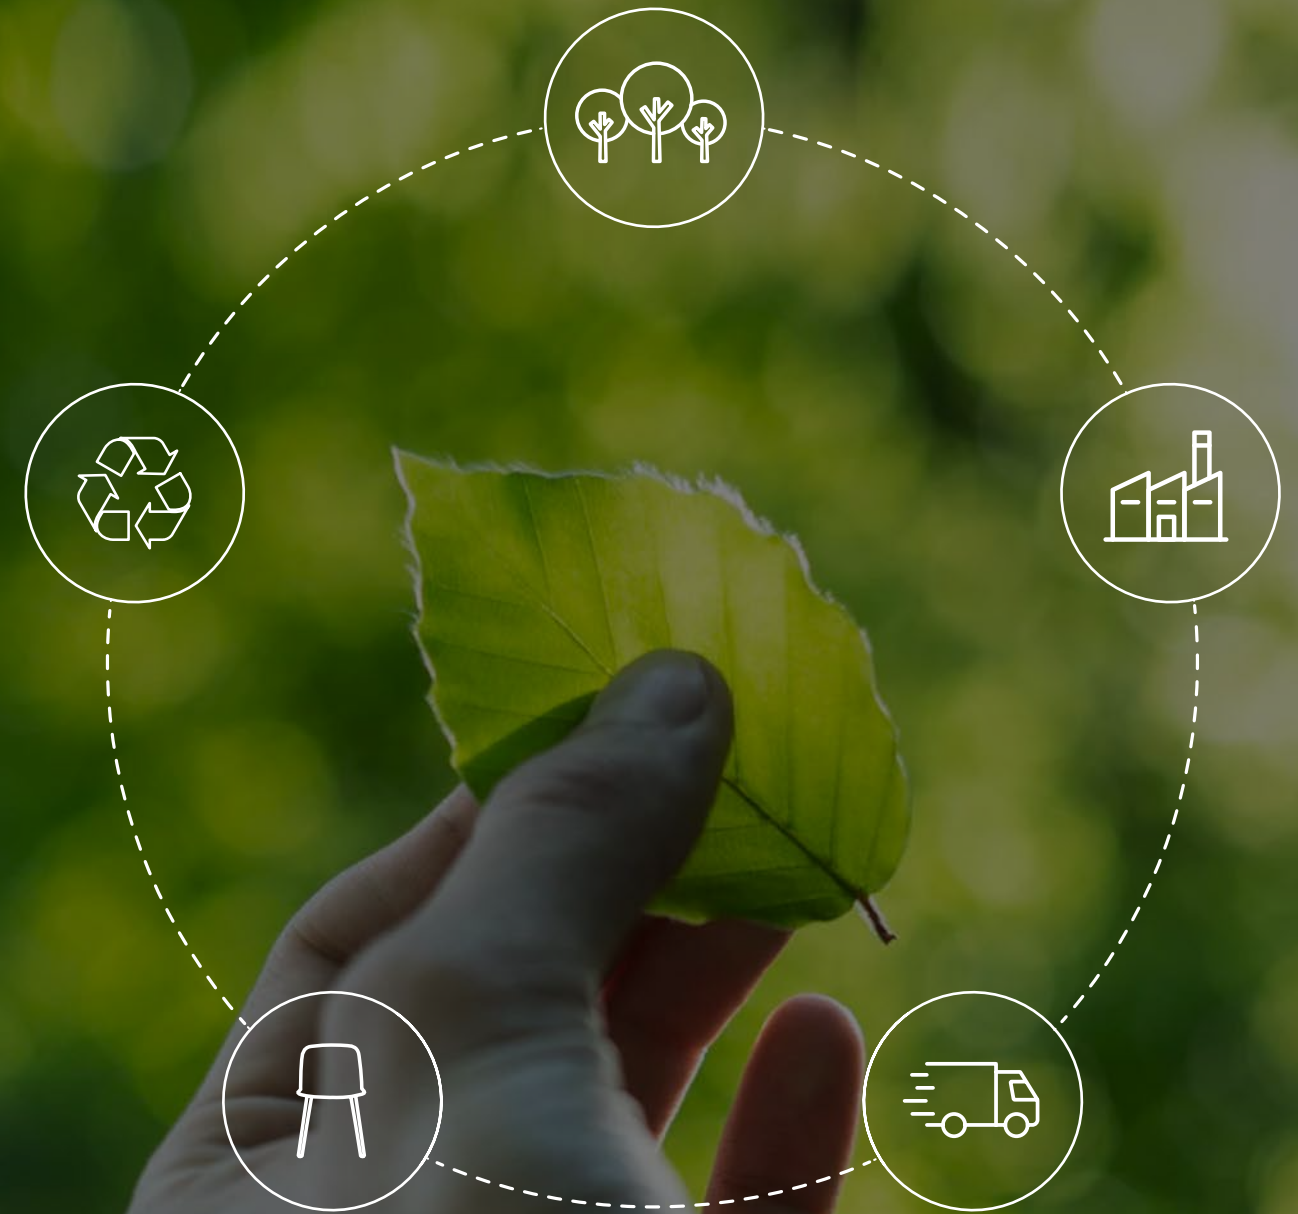

Quinti promuove una progettazione intelligente dei suoi prodotti. Con il supporto dei progettisti e grazie alle competenze acquisite cerchiamo di minimizzare l'impatto complessivo di ogni nuovo prodotto sull'ambiente in ogni fase del suo ciclo di vita: dalla produzione alla spedizione, dall'utilizzo allo smaltimento. Ogni prodotto è pensato riducendo l'utilizzo di materie prime, semplificando la complessità produttiva e favorendo lo smontaggio e il riciclo dei componenti.

Quinti promotes an intelligent design of its products. With the support of the designers and thanks to the acquired skills we try to minimize the overall impact of each new product on the environment at every stage of its life cycle: from production to shipping, from use to disposal. Each product is designed by reducing the use of raw materials, simplifying the production complexity and encouraging the dismantling and recycling of components.

Quinti favorise une conception intelligente de ses produits. Grâce aux compétences acquises, nous cherchons à minimiser l'impact global de chaque nouveau produit sur l'environnement à quelque étape de son cycle de vie: de la production à la livraison, de l'utilisation à l'élimination des déchets. Chaque produit est pensé en réduisant l'utilisation de matières premières, en simplifiant la complexité de production et en favorisant le démontage et le recyclage des composants.

“Eco-friendly design is made of commitment, responsibility, knowledge and research, for an active protection of the environment.”

“Le design durable est faite d'engagement, de responsabilité, de connaissance et de recherche, pour une protection active de l'environnement.”

“La sostenibilità sociale è un impegno strategico, fatto di scelte, priorità, condivisione e cambiamento”

Qualità dei prodotti e rispetto per l'ambiente sono pratiche consolidate e attestate dalla certificazione ISO 9001 e ISO 14001. L'adozione dei Criteri Ambientali Minimi CAM favorisce la scelta di partner affidabili per lo sviluppo di un mercato di prodotti e servizi a ridotto impatto ambientale. Ultima in termini di certificazione è quella relativa al legno che sono certificati FSC (materiale utilizzato proviene prevalentemente da processi di riciclaggio).

Product quality and respect for the environment are consolidated practices and certified by the ISO 9001 and ISO 14001 certification. The adoption of the Minimum CAM Environmental Criteria facilitates the choice of reliable partners for the development of a market of products and services with reduced environmental impact. Last in terms of certification is that relating to wood that are FSC certified (material used comes mainly from recycling processes).

Qualité des produits et respect de l'environnement sont des pratiques consolidées et certifiées par les certifications ISO 9001 et ISO 14001. L'adoption des Critères Environnementaux Minimaux CAM favorise le choix de partenaires fiables pour le développement d'un marché de produits et services à impact environnemental réduit. La dernière certification est celle relative aux bois qui sont certifiés FSC (matériau utilisé provient principalement des processus de recyclage).
